Fall 2010 Cankerworm Banding Program 2

Attachment:
October 18 Housing & Neighborhood Development Committee Summary..... 2

INFORMATION:

Fall 2010 Cankerworm Banding Program
Staff Resource: Don McSween, E&PM, 704-336-3459, dmcsween@charlotttenc.gov

It has been two years since the aerial spray for the fall cankerworm. Due to the effectiveness of the spray and banding programs, the cankerworm populations are low. In order to help keep the populations as low as possible and protect the tree canopy, the City is banding over 5,500 large Willow Oaks along its streets.

The City is also asking citizens to help in keeping the populations low by banding trees on private property in the areas east of I-77 from Runnymede/Fairview Road northward to the University area.

Neighborhood organizations interested in the tree-banding matching grants can obtain additional information at http://nbs.charlottenc.gov. The deadline for applications is Friday, October 29.
