

Duke Energy SmartSaver Incentives FY 2016 Report

What

With Duke Energy's Smart Saver Incentive Program, businesses can receive a check for installing high-efficiency lighting, HVAC, pumps and other qualifying equipment. These incentives have enabled Engineering & Property Management to help recover some of the initial costs associated with energy efficiency upgrades.

How

The Energy Team of Building Services takes the lead to work with various project managers, vendors, and contractors to complete and submit all paperwork for projects that involve energy efficiency. If you would like to know if one of your projects may be eligible for a rebate, please contact Laurie Sickles, David Miller, or Patrick Cerri.
