

Workaround for Internet Explorer 10

The City of Charlotte Recruitment site is not compatible with the latest version of Internet Explorer, version 10. Please follow the below instructions to change your browser mode to version 9, which will allow you to review and apply for City positions.

Note: The Browser Mode will only be changed in the current browser window. If you close your internet session and return, you will have to change the browser mode again.

- Navigate to the Job Listings page: <http://charmeck.org/services/category/Pages/JobsEmployment.aspx>
- Select Job Listings
- Click the gear symbol  in the upper right corner (just below the red X)
- Select F12 Developer Tools

- The below toolbar should appear on your screen with Browser Mode: IE10. Click on 'Browser Mode: IE10' and select 'Internet Explorer 9' in the drop down list. This will change your browser to the previous version and allow you to review and apply for positions on the City Jobs Site.
