Real estate acquisition is ongoing for the Barringer Drive Bridge Replacement Project. During this phase, City real estate representatives work with property owners to acquire right-of-way and easements necessary for construction. See reverse for more details.

July 2016

Barringer Drive Bridge Replacement Project

The Barringer Drive Bridge Replacement project will replace the bridge over Irwin Creek. The new bridge will include sidewalks along both sides. A public meeting was held in March 2014 to receive input on the project design from citizens.

The real estate phase, a 12- to 18- month process, began in January 2016 and is still underway. During this phase, City real estate representatives work with property owners to acquire right-of-way and easements necessary for construction. This phase will also include any necessary utility relocations. Once all of the right-of-way and easements are obtained, the project will be bid for construction. Construction is estimated to begin in summer 2017.

The City appreciates your patience during this process. We will continue to keep you informed on the status of the project.

For more information, please contact:

Allison Brickey, Senior Project Engineer
