East Forest Neighborhood

The 3rd public meeting for the East Forest Neighborhood Improvement Project (NIP) was held February 12, 2008. At this drop-in meeting, residents viewed the selected design alternative along with a map of the proposed water main work. Stations were set up with large maps displaying the proposed location of sidewalks and water mains.

Based on comments received at the 3rd public meeting, the City elected to make some modifications to the design alternative. The map at right illustrates the changes and represents the final design alternative.

Due to the drought and subsequent budget deficit, Charlotte Mecklenburg Utilities (CMU) has been forced to postpone the proposed water main work. However, if residents notice water main leaks or discolored water, they are asked to call 311. CMU will address the problems at that time.

The City will finalize the Planning Phase and begin the Design Phase by summer 2008.

If you have any questions, please feel free to call or email the City's Project Manager, Kristie Kennedy, at 704-336-6194 or kkennedy@ci.charlotte.nc.us.

From stream preservation and public landscaping to new sidewalks and the NASCAR Hall of Fame, Engineering & Property Management is building value for Charlotte. We manage property and projects that help make Charlotte a great place to live, work and play.
