

REAL ESTATE/UTILITY RELOCATION PHASE

# TRANSPORTATION *update*

## BEATTIES FORD ROAD WIDENING

MAY 2013

## Beatties Ford Road Widening Project Update

**For more information on this project, please contact: Imad Fakhreddin, E&PM Project Manager 704-336-7926 or [ifakhreddin@charlottenc.gov](mailto:ifakhreddin@charlottenc.gov)**

The project is nearing the end of the real estate acquisition phase. Preparation for overhead utility relocation work will start later this year by removing trees for overhead lines and grading for utility poles within the project limits. This work is needed before roadway construction starts in order to reduce conflict with utilities and expedite construction.

We will continue to keep you informed as the grading work is about to begin and utilities companies start their work.

This project will widen Beatties Ford Road between Capps Hill Mine Road and Pauline Lane to a four-lane, median-divided roadway with sidewalks, bicycle lanes and planting strips. The 1.7 mile project will provide safer travel for all modes of transportation including motorists, pedestrians and bicyclists. Funding for this project was included in the November 2010 Transportation bonds.
