UTILITY RELOCATION

# TRANSPORTATION *update*

## BEATTIES FORD ROAD WIDENING PROJECT

OCTOBER 2013

## Beatties Ford Road Widening Project

For more information on this project, please contact: **Imad Fakhreddin, E&PM Project Manager**  
**704-336-7926 or [ifakhreddin@charlottenc.gov](mailto:ifakhreddin@charlottenc.gov)**

Many existing utility facilities are in conflict with the proposed project construction and will need to be relocated prior to construction. Preparations for utility relocations will start in November.

This work includes removing trees in conflict with the proposed overhead utilities, grading work for utility poles along the west side of Beatties Ford Road between Capps Hill Mine Road and Hamilton Drive (Martin Marietta's property only), installing a fence along the construction easement on Martin Marietta's property and seeding and mulching the graded area.

Utility relocation is scheduled to start in 2014 and last until late 2015 or early 2016. Roadway construction will start after the utilities work is complete. The project includes widening Beatties Ford Road from Capps Hill Mine Road to Pauline Lane to four lanes with turning lanes, planted median, bicycle lanes, curb and gutter, planting strips, sidewalks, street lights and landscaping.

For more information, please visit the project website at [epm.charmeck.org](http://epm.charmeck.org). Click on Transportation Projects, then Beatties Ford Road.
