Building Value for Charlotte

Your help is needed to keep the roadway and neighborhood looking nice. See reverse for details on landscaping maintenance.

Construction and landscaping on the Rea Road Improvements Project is complete.

Rea Road Improvements Project

Thank you for your patience. We hope you are pleased to see construction and landscaping complete and that your walks along the new sidewalks are enjoyable. To keep the roadway and your neighborhood looking nice, your help is needed.

City ordinance requires property owners adjacent to street right-of-way to maintain the area up to the back of the curb, including mowing the planting strips. Most residents, property owners and Homeowners Associations are maintaining their properties to the back of curb. We thank you, and remind all property owners of their responsibility to do the same.

The City will maintain the planted median and street trees within the right-of-way. All trees planted outside the right-of-way will be under warranty until March 2017, after which they are the responsibility of the property owners and considered private trees.

If you have any questions about the City ordinance, or mowing overgrown vegetation on private property or in the right-of-way, call 311 or go to <http://charlottenc.gov/Code Enforcement> and click "tall weeds and grass" under the "Report a Code Violation" heading.

For more information, please contact
Imad Fakhreddin, Project Manager
704-336-7926 or ifakhreddin@charlottenc.gov
