

Alanhurst/Cherrycrest

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

March 30, 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services held its first public meeting for the Alanhurst/Cherrycrest Storm Drainage Improvement Project on March 1, 2012 at St. Andrew's United Methodist Church. The project goals are to reduce flooding of streets and structures, as well as reduce erosion along the stream and channel (by stabilization) where needed. The meeting provided the opportunity to present the results of the existing conditions analysis and receive resident input and suggested solutions.

Meeting highlights:

- Project Manager Susan Tolan welcomed the attendees, introduced the project team and explained the history and the purpose of the project.
- Scott Sigmon, Project Manager for the City's design consultant, WK Dickson, presented the results of the existing conditions analysis.

1. Additional inlets are needed in the streets to reduce the ponded water in the streets
 2. The Alanhurst and Cherrycrest pipe crossings are not sized sufficiently to convey the design flows without overtopping the streets.
 3. Several structures are potentially impacted by flooding.
- A question and answer session was held.

For more information about this project or detailed meeting minutes, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, *then Active Projects and Alanhurst/Cherrycrest.*

If you have any questions, please contact Project Manager Susan Tolan at stolan@charlottenc.gov or 704-432-0407.

CHARLOTTE.
