

Beckwith/Meadow

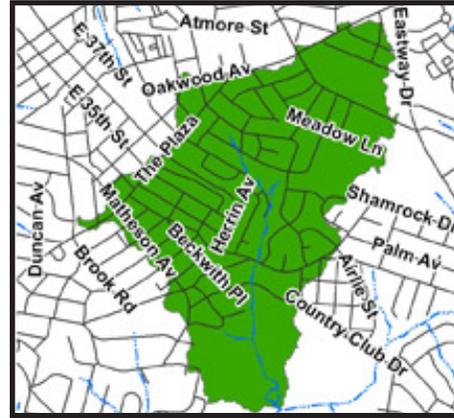

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

May 2015

Charlotte-Mecklenburg Storm Water Services and consultant STV are progressing through the planning phase for the Beckwith/Meadow Storm Drainage Improvement Project. Additional work has been performed to provide details of how the existing system currently works. Work is also underway to develop conceptual designs to improve the system.

Please note this project has transferred to Jackie Bray.

Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

If my property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
