storm drainage improvement project

YOUR STORM WATER FEES AT WORK

December 2011

Dear Resident:

Charlotte-Mecklenburg Storm Water Services is planning a public meeting for the Blenheim Storm Drainage Improvement Project in the summer of 2012. Storm Water Services and the engineering consultant HDR are coordinating with several government groups and working through a number of challenges. Once this has been completed, staff will hold a public meeting for input. A detailed meeting notice will be sent two weeks prior to the meeting date.

Additional surveying is needed. Representatives of RJH Surveying may need to enter your property to survey property lines and locate physical and topographic features. While State law authorizes such entry onto private property, no buildings or structures will be disturbed. Work is expected to begin in January.

If you have any questions, please contact Project Manager Greg Cole at 704-336-4647 or email [gcole@charlottenc.gov](mailto:gcole@charlottenc.gov).

## Within the last year, Storm Water fees...

Funded 57 Capital Improvement Projects and protected the water quality of more than 3,000 miles of streams and shoreline.

Fees included funding of the Upper Stoney Creek Stream Restoration near Mallard Creek Church Road. In addition to reconstructing open channel areas, boulders and logs were added to reduce bank erosion during large storm events.

The Upper Stoney Creek stream restoration project will improve water quality, enhance forested riparian areas and protect aquatic habitat.
