

Blenhein

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

Dear Resident:

Charlotte-Mecklenburg Storm Water Services continues to work on the Blenheim Storm Drainage Improvement Project. The project goals are to update infrastructure, reduce flooding of structures and streets, provide emergency access, reduce erosion and increase stream capacity.

The engineering consultant, HDR, is working on producing the 70% design documents and plats for easements. A public meeting will be held to share the design and explain where easements are needed.

Staff continues to work with the residents needing to be relocated from flood-prone areas. The City has begun

demolishing the empty houses. Demolition of the houses can take a couple months as each house must be tested for asbestos and have any asbestos removed before the house can be demolished.

For more information about this project, please visit our website <http://stormwater.charmeck.org> and click on **Storm Water Projects, Active Projects**, then **Blenhein**.

If you have any questions about this project, please contact Project Manager Greg Cole at gcole@charlottenc.gov or 704-336-4824.

June 2013

Be a Water Watcher:
Call 311 to report misuse of storm drains or unusual creek conditions.

Join us on Facebook at www.facebook.com/waterwatchers.

CHARLOTTE

Engineering & Property Management
Storm Water Services Division
600 East Fourth Street
Charlotte, North Carolina 28202

Let's work together to protect
Charlotte's valuable water sources.

 **waterwatchers**

are Charlotte-Mecklenburg residents just like you who report instances of...

- Unusual creek conditions: *odd smells, color changes, dead fish or foam*
- Improper dumping of substances into storm drains: *grease, trash, paint or other pollution*
- Poorly stored chemicals, sewage overflows, erosion from construction sites or broken pipes

Keep our area waterways clean by calling 311 or
visiting stormwater.charmeck.org to report conditions.
