

Blenhein

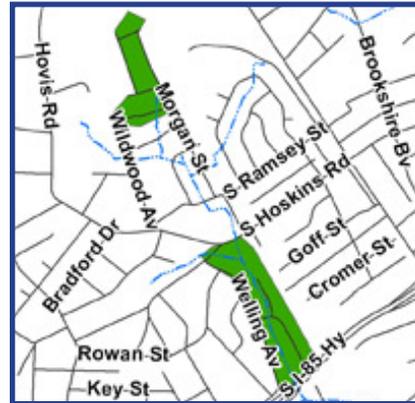

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

May 2015

Charlotte-Mecklenburg Storm Water Services has begun the bid phase for the Blenheim Storm Drainage Improvement Project. The construction plans have been advertised for bid and five companies have submitted proposals for the work. We are in the process of evaluating the proposals.

Construction is anticipated to start in the fall of this year. We will send out another mailer before the start of construction.

Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

If my property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
