

Blenhein

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

Dear Resident:

Charlotte-Mecklenburg Storm Water Services continues to work on the Blenheim Storm Drainage Improvement Project. The project goals are to update infrastructure, reduce flooding of structures and streets, provide emergency access, reduce erosion and increase stream capacity.

Engineering consultant HDR has completed 70% of the design documents and easement maps. The next step is to hold a public meeting to share the design and explain where the City will need easements. Meeting details will be mailed to residents approximately two weeks prior to the meeting. The City has finished helping all the residents who needed

to be relocated from flood-prone areas. The demolition of the empty houses is nearly complete. All demolition should be completed by the end of November.

For more information about this project, please visit our website <http://stormwater.charmeck.org> and click on **Storm Water Projects, Active Projects, then Blenheim.**

If you have any questions about this project, please contact Project Manager Greg Cole at gcole@charlottenc.gov or 704-336-4824.

October 2013

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
