

Brentwood Place

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

January 2013

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineer, The Isaacs Group, are working to finalize the design of the Brentwood Place Storm Drainage Improvement Project. The real estate phase is also nearly complete. When both design and real estate phases are finished the bid phase will begin.

For more information about this project, please visit

<http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Brentwood**.

If you have any questions about this project, please contact Project Manager Tom Purvis at 704-336-3660 or tpurvis@charlottenc.gov.

It is that time of year when a chill fills the air and snow begins to fall.

Sometimes, instead of snow, we get ICE. Next time the weather turns bad and your sidewalk is slick, spread sand to get a grip on that slippery walk.

If bad weather strikes the area causing limbs and brush to fall, residents are encouraged to prepare debris to normal collection guidelines (limbs no longer than 5 feet in length and no wider than 4 inches in diameter). The storm debris should be taken to curbside. Do not place debris in storm drains, gutters or on creek banks.
