

Dear Resident:

BRENTWOOD PLACE

STORM DRAINAGE IMPROVEMENT PROJECT

UNDER CONSTRUCTION

Workers install a concrete junction box in Revolution Park.

Construction is underway for Brentwood Place Phase 2 Storm Drainage Improvement Project. Work commenced at the downstream end of the project in Revolution Park with the installation of a concrete box culvert along the east side of the synthetic turf field and a concrete pipe along the west side of the same field. Work has continued to progress into the Barringer Drive right-of-way. Subsequent to the installation of storm drainage facilities within the park, the contractor will reseed disturbed areas and repave the parking lot, as culvert and pipe installation continues across Barringer Drive.

Partial and full road closures will be utilized to facilitate the construction of the storm drainage facilities from Revolution Park to the north side of Barringer Drive. Temporary construction traffic signage will be utilized to direct motorists around the construction work zones. Detour signage will be provided during full road closures and local access to homes will be available. There will be no vehicular and pedestrian access across the culvert. Please plan on taking other neighborhood streets for alternative access.

Construction start date for Phase I is yet to be determined.

For more information about this project, please visit our website to view project updates at: <http://stormwater.charmeck.org>. Click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Brentwood Place**.

If you have any questions, please contact one of the project team members:

On-site Construction Inspector:

Monty Bisette: 704-400-7788

Email: mbisette@charlottenc.gov

Project Manager:

Tom Purvis: 704-336-3660

Email: tpurvis@charlottenc.gov

Construction Supervisor:

Gary Stansbury: 704-336-2667

E-mail: gstansbury@charlottenc.gov

A construction inspector will be on site daily to address any questions or concerns. Please note efforts are taken to minimize disruption.
