

UNDER CONSTRUCTION

BRENTWOOD PLACE

STORM DRAINAGE IMPROVEMENT PROJECT

Contractor installs a 36" steel pipe in Revolution Park, just upstream of Irwin Creek.

Dear Resident:

May 2014

Construction is underway for Brentwood Place Phase I Storm Drainage Improvement Project. Work commenced within the railroad right-of-way, southeast of the Remount Road/Wilkinson Boulevard intersection. Work within the railroad right-of-way includes the installation of two drainage pipes beneath the railroad tracks. After installation of these pipes, work will continue with the installation of a reinforced concrete pipe on the north side of the railroad right-of-way, through private property and eventually across Remount Road.

Construction continues for Phase II. Storm water infrastructure has been installed at Revolution Park. The parking lot has been paved and the Contractor is working to stabilize remaining disturbed areas within the park. New pipe and culverts have been installed across Barringer Drive and Brentwood Place. Channel improvements have been installed between Barringer Drive and West Boulevard. Work will continue to progress across West Boulevard. A new culvert and associated retaining wall have been installed at Fordham Road.

Partial and full road closures will be utilized to facilitate the construction of the storm drainage facilities in West Boulevard. Temporary construction traffic signage will be utilized to direct motorists around the construction work zones. Detour signage will be provided during full road closures.
