

Chandworth

storm drainage improvement project

your storm water fees at work

October 2013

Dear Resident:

Charlotte-Mecklenburg Storm Water Services continues to make progress on the Chandworth Storm Drainage Improvement Project. The consultant, Dewberry Engineers, has finished gathering additional design level information in critical areas. The project team will continue to make a few more adjustments to the plan prior to the consultant starting on the preliminary design. The planning phase should be complete by the summer of 2014.

If you have any questions, please contact Project Manager Jackie Bray at jbray@charlottenc.gov or 704-336-6770.

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
