storm drainage improvement project

your storm water fees at work

June 2015

Charlotte-Mecklenburg Storm Water Services and Dewberry staff continue to prepare drainage easement plats necessary for construction. Once complete, a public meeting will be held to kick off the real estate phase and to review the easements needed for construction. Staff is also working with several utility companies to resolve conflicts where utility lines cross the project.

Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

If my property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
