

July 2016

Project Status

Charlotte-Mecklenburg Storm Water Services is selecting a new engineering consulting firm to complete the design phase of the Chandworth Storm Drainage Improvement Project. We anticipate the consulting firm will be awarded a contract for services by the end of the year. At that time, the new consultant will work with the project team on the preliminary design.

Investing in Infrastructure

Charlotte has an aging public storm drainage system, much of which is past its useful life. The City repairs, replaces and installs new storm drainage infrastructure when it deteriorates or cannot handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Chandworth Storm Drainage Improvement Project goal is to reduce flooding of streets and structures by improving the storm drainage infrastructure within the neighborhood.
