

# Chatham

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineer, Kimley Horn and Associates, have begun initial studies of problems in the Chatham neighborhood and watershed. The surveying work is complete and is being reviewed by City staff.

The project team will review customer complaints and questionnaire responses, then analyze the existing storm drainage infrastructure to determine problem areas. These results will be shared with the neighborhood for feedback.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Chatham**.

If you have any questions, please contact Project Manager Matthew Anderson at 704-336-7923 or [manderson@charlottenc.gov](mailto:manderson@charlottenc.gov).

February 2013

It is that time of year when a chill fills the air and snow begins to fall.

Sometimes, instead of snow, we get ICE. Next time the weather turns bad and your sidewalk is slick, spread sand to get a grip on that slippery walk.

If bad weather strikes the area causing limbs and brush to fall, residents are encouraged to prepare debris to normal collection guidelines (limbs no longer than 5 feet in length and no wider than 4 inches in diameter). The storm debris should be taken to curbside. Do not place debris in storm drains, gutters or on creek banks.
