

# Chatham

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineer, Kimley Horn and Associates, have begun initial studies of problems in the Chatham neighborhood and watershed.

The project team has reviewed customer complaints and questionnaire responses, and performed preliminary analysis of the existing storm drainage infrastructure to determine problem areas. An existing conditions study has been completed and comments are being addressed. Some additional analysis is needed to address those review questions. Once the report has been resubmitted the results of that study will be shared with the neighborhood for feedback.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Chatham**.

If you have any questions, please contact Project Manager Matthew Anderson at 704-336-7923 or [manderson@charlottenc.gov](mailto:manderson@charlottenc.gov).

October 2013

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
