

February 2016

Charlotte-Mecklenburg Storm Water Services and Onsite Development continue with the construction phase.

Two pedestrian bridges have been installed over the channel downstream of the box culvert outfall. These replace the wooden bridges that were removed for this project.

Onsite Development began working on the Biltmore Drive sanitary sewer in January for Charlotte Water. The main installation

of the sanitary sewer repair work is more than 25 percent complete. Work will continue on Saturdays. If you have any sewer-related questions, please call Inspector Barron Stark at 704-309-2131. If you see or suspect a sewer backup or overflow please call 704-336-7600 and select sewer emergency. Charlotte Water staff will respond 24/7. This work will continue over the next several months. Once complete, work will resume on the storm drainage improvements.
