

# Cherokee/Scotland

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

June 6, 2008

Dear Resident,

Charlotte-Mecklenburg Storm Water Services (Storm Water) held a public meeting on May 8, 2008 at Christ Episcopal Church for the Cherokee/Scotland Storm Drainage Improvement Project.

The meeting discussed the recommended project alternative for the Cherokee/Scotland Project and gathered additional feedback. Meeting highlights:

- Mr. Troy Eisenberger, Project Manager, discussed the organization of the project team and provided a general overview of the Storm Water Services Program.
- The planning phase is complete. The proposed alternative was presented at the meeting. This alternative was developed to ensure improvements will be implemented in the most appropriate locations.
- He emphasized that community involvement is imperative to the success of the project and the team wanted to hear any concerns.
- The Design Phase is anticipated to begin during the summer of 2008, which includes developing construction drawings

for the proposed improvements. This phase typically lasts 18 to 24 months. A third public meeting will be held when the design plans are 70% complete.

- Mr. Eisenberger noted that construction is a maximum of two years.
- The meeting concluded with breakout sessions that invited citizens to interact with the project team one-on-one.
