

# Cherokee/Scotland

storm drainage improvement project

your storm water fees at work

June 2010

Dear Resident:

Charlotte-Mecklenburg Storm Water Services, along with consulting engineers, Dewberry & Davis, Inc., continue to work in the design phase of the Cherokee/Scotland Storm Drainage Improvement Project.

An additional section of the project has been added (shown on other side) to address resident concerns. These additional improvements are being designed to collect local drainage that is flowing from Biltmore to Scotland. These improvements are not intended to address flooding from Briar Creek. This area, as well as the updated design, will be included in the 70% design plans to be presented at the next public meeting.

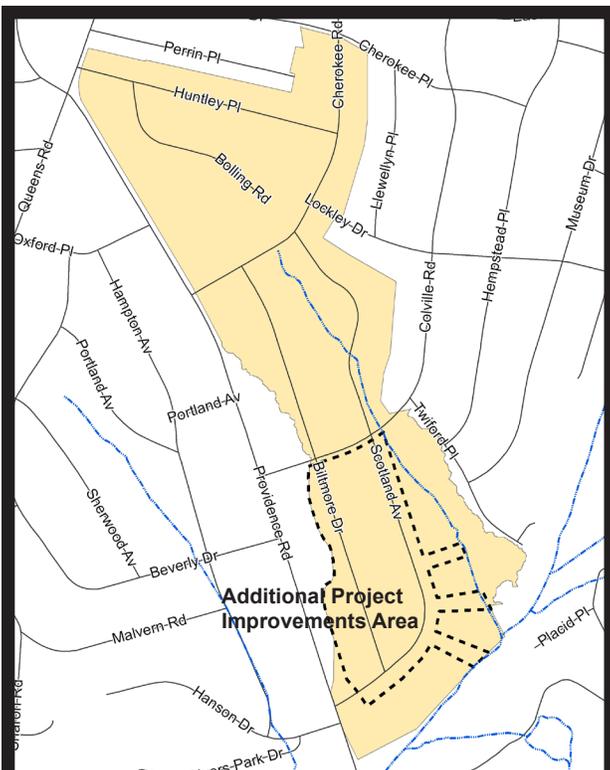

This notice serves to inform you that Dewberry and their representatives may need to enter your property (within the new project area only) for the purpose of surveying, locating

physical storm water features, and/or collecting geotechnical data. While State law authorizes entry onto property to locate property lines and physical features, no buildings or structures on the property will be entered or disturbed.

Please contact the project manager if you would like to discuss any flooding issues and/or concerns.

You may also view project updates and exhibits on the web at: <http://stormwater.charmeck.org> (Click on **Storm Water Projects, Storm Water Projects** again and then **Cherokee/Scotland**).

If you have any questions, please contact Project Manager, Troy Eisenberger at [teisenberger@charlottenc.gov](mailto:teisenberger@charlottenc.gov) or 704-336-4835.
