

Cherokee/Scotland

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services has acquired all necessary permits and easements for construction of the Cherokee/Scotland Storm Drainage Improvement Project. A constructability review of the final design plans is underway, and a few minor revisions may be needed. It is anticipated this review will be complete in the next several weeks and then the project will start the bid phase.

As part of the bid phase, staff will begin preparing the bid document. Competitive bids are taken from responsible contractors to perform the work.

After City Council approval, the City awards the construction contract to the lowest responsible bidder. The bid phase typically lasts 4 to 6 months.

For more information about this project, please visit our website at: <http://stormwater.charmeck.org> Click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **Cherokee/Scotland**.

If you have any questions, please contact Project Manager Jackie Bray at jbray@charlottenc.gov or 704-336-6770.

October 2013

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
