

Coulwood

stream restoration project

YOUR STORM WATER FEES AT WORK

October 2013

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineers, Collins & Baker Engineering, P.A. and US Infrastructure of Carolina, Inc., continue to meet and coordinate the stream restoration project with Colonial Pipeline to minimize project impacts due to access and easements as well as address security and operational concerns.

The main project goal is to restore the primary stream from the Colonial Pipeline Pond to Gum Branch near Birchwood Drive to a more natural and functional state to improve water and environmental quality. The project also includes improvements to the Colonial Pipeline Pond that will help maximize the water quality benefits of the project.

For more information about Charlotte-Mecklenburg Storm Water Services and stream restoration, please visit our website at <http://stormwater.charmeck.org>.

If you have any questions about this project, please contact Project Manager Matthew Anderson at 704-336-7923 or manderson@charlottenc.gov.

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
