

Hampton Avenue

storm drainage improvement project

your storm water fees at work

April 2015

Charlotte-Mecklenburg Storm Water Services Project Team is currently reviewing the Preliminary Design Plans. The review will be complete the first week of May and the consultant will prepare the documents for real estate. A public meeting will be held this summer for residents to provide feedback, and to initiate easement acquisition. Meeting invitations will be mailed to residents about two weeks in advance.

Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

My property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
