

August 2015

Project Status:

Charlotte-Mecklenburg Storm Water Services Project Team has completed their review of the Preliminary Design Plans and the consultant is preparing the documents for easement acquisition.

Next Steps:

A public meeting will be held this fall for residents to provide feedback, and to initiate easement acquisition. Meeting invitations will be mailed to residents two weeks in advance.

Investing in Infrastructure

The City must replace pipes, storm drains and other structures when they deteriorate or become too small to handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Hampton Avenue Storm Drainage Improvement Project goals are to reduce flooding of streets and structures and address channel capacity and erosion problems in your neighborhood.
