

Hampton Avenue

storm drainage improvement project

your storm water fees at work

December 12, 2011

Dear Resident:

We have been working diligently to complete the alternative analysis for the Hampton Avenue Capital Improvement Project. Due to our review time frame being shortened by the holiday season, we are postponing the public meeting until after the first of the year.

We will notify you of the new time and location in January 2012.

For more information, visit our website:

<http://stormwater.charmeck.org>. Click on the **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Hampton Avenue**.

If you have any questions, please contact Project Manager Danee McGee at 704-336-4102 or dmcgee@charlottenc.gov.

Pollution Prevention:

A Guide to Yard Waste

Lawn maintenance can make your house and yard more beautiful. When it rains, water flows off our yards, streets and parking lots directly to our creeks and lakes without ever being cleaned. As it flows to storm drains, storm water can pick up anything in its path including oil, dirt, litter, pet waste and yard chemicals.

Yard Waste

Not only does yard waste cause blockages to the drainage system which leads to localized flooding, it can also quickly super-fertilize streams and lakes which leads to algae blooms and fish kills.

- Sweep up yard debris from streets and sidewalks instead of washing it away.
- Blow leaves and grass clippings back into your yard instead of leaving them in the street to wash down the storm drain.
- Never dump grass clippings and other yard waste into storm drains or on creek banks.
- Curb bagged yard waste or compost it.

For more information on pollution prevention or yard waste, call 311 or visit us at <http://stormwater.charmeck.org>.
