

December 2015

Project Status:

Charlotte Storm Water Services and engineering consultant, W.K. Dickson, are completing the documents for easement acquisition. The real estate phase should begin soon.

Next Steps:

A public meeting is scheduled for early next year to discuss the design of the storm drainage system, the utility relocations and property access for construction of the project. Meeting invitations will be mailed to residents two weeks in advance.

Investing in Infrastructure

Charlotte has an aging public storm drainage system, much of which is past its useful life. The City repairs, replaces and installs new storm drainage infrastructure when it deteriorates or becomes too small to handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Hampton Avenue Storm Drainage Improvement Project goals are to reduce flooding of streets and structures and address channel capacity and erosion problems in your neighborhood.
