

Hill Street

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

April 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services has started the existing conditions analysis of the storm drainage system within the Hill Street project area. Dewberry Engineering will be gathering additional survey within the project area and submitting the existing conditions analysis for review.

If you have any photographs or videos of recent storm events that you would like to share, please submit them.

The Project Team may need to enter your property to collect survey data on the existing storm drainage system. While State law authorizes this access to private property, no buildings or structures will be entered or disturbed. The survey work will begin in May and take about a month to complete.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Hill Street**.

If you have any questions, please contact Project Manager Danee McGee at dmcgee@charlottenc.gov or 704-336-4102.

CHARLOTTE

Engineering & Property Management
Storm Water Services Division
600 East Fourth Street
Charlotte, North Carolina 28202

Did you know?

- The top two pollutants in Charlotte creeks are sediment and bacteria.
- The best way to control erosion is to plant something. Nothing holds soil in place better than plant roots.
- Soil testing in North Carolina is free. Take the guesswork out of fertilizer and lime purchases.
- Charlotte receives more rain than Seattle.
- Creeks start in Charlotte and flow downstream out of the County.
