

June 2016

### ***Project Status***

Charlotte-Mecklenburg Storm Water Services is selecting a new engineering consulting firm to complete the design phase of the Hill Street Storm Drainage Improvement Project. We anticipate the consulting firm will be awarded a contract for services by the end of the year. At that time, the new consultant will work with the project team on the preliminary design.

### ***Investing in Infrastructure***

Charlotte has an aging public storm drainage system, much of which is past its useful life. The City repairs, replaces and installs new storm drainage infrastructure when it deteriorates or cannot handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Hill Street Storm Drainage Improvement Project goal is to reduce flooding of streets and structures throughout the neighborhood.
