Hill Street

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

November 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services has been working with Dewberry and Davis, Inc., to finalize the survey data on the existing storm drainage system and start the planning phase. The first step is to utilize the survey data to evaluate the existing storm drainage system and determine the location of deficiencies.

Thank you to the property owners who have completed and sent in questionnaires. These help us identify additional areas of concern that will need improvement. Typical areas of concern may include channel erosion, flooding and infrastructure failures.

If you have any problems with flooding due to street water of infrastructure failures please call the Storm Water Services' hotline at 311.

For more information about this project, please visit our website at **http://stormwater.charmeck.org** and click on ***Storm Water Projects*** drop down menu in the green bar, *then* ***Active Projects*** *and* ***Hill Street.***

If you have any questions, please contact Project Manager Danée McGee at dmcgee@charlottenc.gov or 704-336-4102.

Charlotte-Mecklenburg STORM WATER Services

Clogged storm drains can cause street flooding.

BEFORE it rains, remove trash, leaves and other debris from storm drains near your home.
