

Hinsdale/Tinkerbell

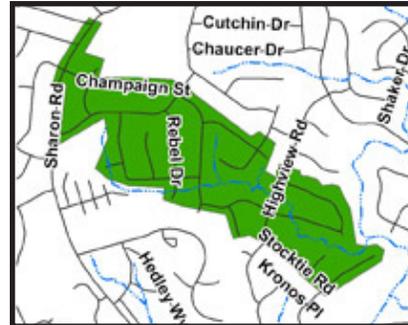

storm drainage improvement project

your storm water fees at work

April 2015

Charlotte-Mecklenburg Storm Water Services and consulting engineer, Armstrong Glen, P.C. (AG) continue to work on the design phase, which creates the documents to follow for construction.

AG has been coordinating with the various utility companies. You may have seen some of them locating utilities in the neighborhood. In the next month, AG will be working with a pipe video subcontractor. The storm drainage pipes we plan to leave in place will have video cameras sent down them to verify their condition.

Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

If my property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
