

June 2016

Project Status

Charlotte-Mecklenburg Storm Water Services and Armstrong Glen continue to work on the design phase. The design plans are being coordinated with the private utilities (electric, phone, gas, etc.). The plans are also being coordinated with Charlotte Water for possible sanitary sewer improvements along the stream between Hinsdale Street and Stocktie Road.

Next Steps

Real estate representatives will work with property owners to acquire easements necessary for construction as part of the real estate phase.

Investing in Infrastructure

Charlotte has an aging public storm drainage system, much of which is past its useful life. The City repairs, replaces and installs new storm drainage infrastructure when it deteriorates or cannot handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Hinsdale/Tinkerbell Storm Drainage Improvement Project goals are to reduce flooding of streets and structures throughout the neighborhood.
