

# Kenilworth/Romany Storm Drainage Improvement Project

February 2011

Dear Resident:

We need your input. Charlotte-Mecklenburg Storm Water Services has identified your neighborhood for possible storm water system improvements to address structure and road flooding. The Kenilworth/Romany Storm Drainage Improvement Project covers approximately 233 acres. The project is located in the Upper Little Sugar Creek Watershed and is bounded by East Boulevard to the southwest, Euclid Avenue to the northwest, Berkeley Avenue and East Morehead Street to the northeast, and upper Little Sugar Creek to the southeast. This project also includes part of the Carolina Medical Center campus.

This project is in the early planning stages and we would like you to help us identify problems with the culverts, storm drainage systems and creeks in your area. Please complete the enclosed questionnaire, even if you have not experienced problems, and return by February 18, 2011. Postage is prepaid.

We will use customer service feedback and field review analysis to refine the project limits. Thank you for your input and we look forward to working with you.

If you have any other questions or concerns related to the project, please contact Project Manager David Baker at 704-432-5569 or email [dtbaker@charlottenc.gov](mailto:dtbaker@charlottenc.gov).
