

Kenilworth/Romany

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services and engineering consultant, Armstrong Glen, P.C., continue with the design phase. The project goal is to reduce street and structure flooding by improving storm drainage infrastructure.

Project update:

- Staff continues working with utility companies to resolve potential conflicts and concerns. Due to the number of utilities and their associated buffers in the project area, further coordination and some minor excavation has been required to determine the underground locations of some of the utilities. This extra effort delayed generation of easement limits required for the project. City staff wants to better

establish construction areas and easement limits prior to holding a public meeting.

- Once City staff has approval from the utility companies, a public meeting will be scheduled to solicit feedback from property owners. Meeting details will be mailed to you approximately two weeks in advance.

For more information, please visit our website stormwater.charmeck.org and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Kenilworth/Romany**.

If you have any questions, please contact Project Manager Chad Nussman at cnussman@charlottenc.gov or 704-336-5676.

July 2014

HURRICANE SEASON

JUNE 1 - NOVEMBER 30, 2014

A yellow diamond-shaped warning sign with black text that reads "STORMY WEATHER AHEAD". The sign is set against a dark, stormy background with a bright lightning bolt striking down to the right.

2014 forecast:

- 11 named tropical storms
- 3 hurricanes

75% of Charlotte's flooding happens during the months of hurricane season.

Whether it's heavy rain from a named storm or an unexpected cloudburst, Charlotte's flood chances increase dramatically in the summer.
