

Kenilworth/Romany

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

May 2011

Dear Resident,

Charlotte-Mecklenburg Storm Water Services has hired a consultant, Armstrong Glen, P.C., to study possible improvements to the storm drainage system in the Kenilworth/Romany project area. The project boundaries are East Boulevard to the southwest, Euclid Avenue to the northwest, Berkeley Avenue and East Morehead Street to the northeast and Upper Little Sugar Creek to the southeast. While the main focus is the primary storm drainage system from the intersection of Dilworth Road and Romany Road to the outlet into Upper Little Sugar Creek, we will be analyzing the condition of the entire system within the project area for potential improvements.

Representatives from the Project Team may need to enter your property to collect survey data on the existing

storm drainage system. While State law authorizes access to private property for this purpose, no buildings or structures will be entered or disturbed. The survey work is scheduled to begin over the next couple of weeks.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Kenilworth/Romany**.

If you have any questions, please contact Project Manager David Baker at 704-432-5569 or dtbaker@charlottenc.gov.
