

March 2016

### ***Project Status***

Charlotte-Mecklenburg Storm Water Services and consulting engineer, Armstrong Glen P.C., continue with the design phase. During this phase, construction drawings and specifications are developed for the recommended improvements.

### ***Next Steps***

Once plans are finalized, a public meeting will be scheduled to present the preliminary construction plans and discuss easement acquisition needs. A notification with time and location will be mailed to you two weeks in advance of the meeting.

Engineering & Property Management  
Storm Water Services Division  
600 East Fourth Street  
Charlotte, North Carolina 28202

### ***Investing in Infrastructure***

Charlotte has an aging public storm drainage system, much of which is past its useful life. The City repairs, replaces and installs new storm drainage infrastructure when it deteriorates or cannot handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Lincoln Heights Storm Drainage Improvement Project goals are to improve the storm drainage infrastructure and to reduce flooding of streets and structures in your neighborhood.
