

# Louise Avenue

storm drainage improvement project

your storm water fees at work

April 2012

Dear Resident:

Charlotte Storm Water Services has been working with Mecklenburg Schools and CSXT Railroad to complete the project plans so that the project can be bid for construction. Although this has been a lengthy process the project is expected to move forward within the next few months. We have completed the portion of the work that was included with the Seigle Avenue Streetscape, the work on Hawthorne Lane that was under agreement with Midwood Hollow Development and the maintenance work on Thomas Avenue and Kennon Drive. The construction for the remainder of

the project will take up to 2 years to complete after bid phase is complete.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Louise**.

If you have any questions, please contact Project Manager Danée McGee at [dmcgee@charlottenc.gov](mailto:dmcgee@charlottenc.gov) or 704-336-4102.

## Did you know?

- The top two pollutants in Charlotte creeks are sediment and bacteria.
- The best way to control erosion is to plant something. Nothing holds soil in place better than plant roots.
- Soil testing in North Carolina is free. Take the guesswork out of fertilizer and lime purchases.
- Charlotte receives more rain than Seattle.
- Creeks start in Charlotte and flow downstream out of the County.
