

March 2016

**Project Status**

Charlotte-Mecklenburg Storm Water Services and engineering consultant, US Infrastructure of Carolina, Inc., continue to work on the real estate and permitting phases. During the permitting phase, the project team will obtain the required water quality permits from Federal and State agencies.

**Next Steps**

After the real estate and permitting phases are complete, the bid phase will begin. During this phase, the final design plans will be circulated to qualified contractors for a competitive bidding process. After City Council approval, the construction contract will be awarded to the lowest responsible bidder.

**Lyon Court Storm Drainage Improvement Project**

Engineering & Property Management  
Storm Water Services Division  
600 East Fourth Street  
Charlotte, North Carolina 28202

**Investing in Infrastructure**

Charlotte has an aging public storm drainage system, much of which is past its useful life. The City repairs, replaces and installs new storm drainage infrastructure when it deteriorates or cannot handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Lyon Court Storm Drainage Improvement Project goals are to reduce flooding of streets and structures, as well as reduce stream bank erosion by improving the storm drainage infrastructure within the project area.
