

Lyon Court

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

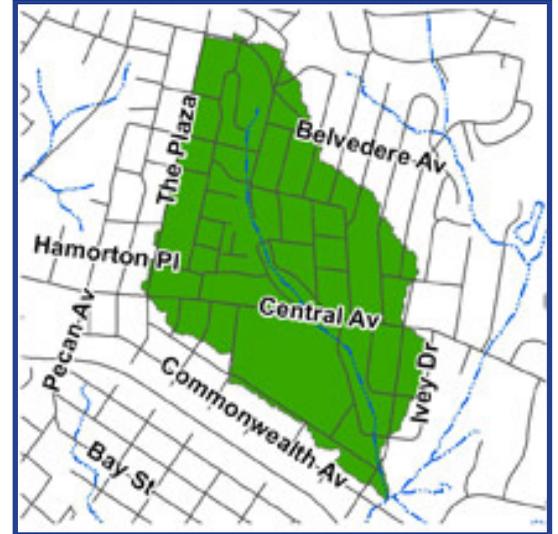

January 2013

Dear Resident,

Charlotte-Mecklenburg Storm Water Services continues to work on the design phase for the Lyon Court Storm Drainage Improvement Project. The project goals include: updating the 70- to 80- year-old infrastructure, reducing flooding in structures and streets, increasing channel capacity and reducing erosion.

For more information about this project, please visit <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Lyon Court**.

If you have any questions, please contact Project Manager William Harris at wtharris@charlottenc.gov or 704-353-1147.

It is that time of year when a chill fills the air and snow begins to fall.

Sometimes, instead of snow, we get ICE. Next time the weather turns bad and your sidewalk is slick, spread sand to get a grip on that slippery walk.

If bad weather strikes the area causing limbs and brush to fall, residents are encouraged to prepare debris to normal collection guidelines (limbs no longer than 5 feet in length and no wider than 4 inches in diameter). The storm debris should be taken to curbside. Do not place debris in storm drains, gutters or on creek banks.
