

# Lyon Court

storm drainage improvement project

your storm water fees at work

March 15, 2011

Dear Resident:

Charlotte-Mecklenburg Storm Water Services held a public meeting on Tuesday, February 15 at Holy Lutheran Church for the Lyon Court Storm Drainage Improvement Project.

During the meeting, the proposed storm drainage project and associated issues were discussed. Meeting highlights:

- Project Manager William Harris introduced the project team and meeting agenda, gave the project history and explained 311 requests received from residents.
- Mr. Harris stated that the project's goals were to update the existing 70 to 80 year old infrastructure, reduce the flooding in structures and streets, increase channel capacity and reduce erosion.
- Andrew Martin, engineering consultant with USI, explained the drainage conditions in the overall project area. He also explained the maps shown at the meeting. Martin also asked for feedback on where street flooding occurs in the neighborhood.

- Mr. Harris concluded the presentation with more information about the planning phase and addressed questions from residents, with assistance from City staff.
- Break-out groups were then held to answer questions individually with meeting attendees.
