

Lyon Court

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

May 17, 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services has begun the design phase for the Lyon Court Storm Drainage Improvement Project. The project goals are to update the 70- to 80- year- old infrastructure, reduce flooding in structures and streets, increase channel capacity and reduce erosion.

The Project Team may need to enter your property to collect additional survey data on the existing storm drainage system. While State law authorizes this access to private property, no buildings or structures will be entered or disturbed. The survey work will begin in May and take about a month to complete.

For more information about this project, please visit <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and Lyon Court**.

If you have any questions, please contact Project Manager William Harris at wtharris@charlottenc.gov or 704-353-1147.

Did you know?

- The top two pollutants in Charlotte creeks are sediment and bacteria.
- The best way to control erosion is to plant something. Nothing holds soil in place better than plant roots.
- Soil testing in North Carolina is free. Take the guesswork out of fertilizer and lime purchases.
- Charlotte receives more rain than Seattle.
- Creeks start in Charlotte and flow downstream out of the County.
