

# Mary Alexander

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services and consulting engineer, Land Design, Inc., continue to work through the planning phase of the Mary Alexander Storm Drainage Improvement Project. Land Design is finalizing the reports. Once complete, staff can review different alternatives to address the drainage issues and concerns in the project area.

This project will focus on the storm drainage issues along Mary Alexander Road between East Mallard Creek Church Road and the entrance to the University of North Carolina at Charlotte. The project will also

analyze the downstream channel that flows from Mary Alexander Road to where it meets Mallard Creek.

For more information about this project, please visit our website <http://stormwater.charmeck.org> and click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **Mary Alexander**.

If you have any questions, please contact Project Manager Steven McCraney at 704-432-0967 or [smccraney@charlottenc.gov](mailto:smccraney@charlottenc.gov).

February 2014

## Shade Your Stream

Property along creeks and lakes should be planted with native trees and shrubs.

For more information about stream buffers, visit <http://stormwater.charmeck.org>
