

Mary Alexander

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services has hired engineering consultant Land Design to study possible storm drainage improvements in the Mary Alexander project area. This project will focus on the storm drainage issues along Mary Alexander Road between East Mallard Creek Church Road and the entrance to the University of North Carolina at Charlotte. The project will also analyze the downstream channel that flows from Mary Alexander Road to the meeting of Mallard Creek.

Representatives from Project Team may need to enter your property to collect survey data on

the existing storm drainage system. While State law authorizes access to private property for this purpose, no buildings or structures will be entered or disturbed.

For more information about this project, please visit our website at: <http://stormwater.charmeck.org> Click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **Mary Alexander**.

If you have any questions, please contact Project Manager Steven McCraney at 704-432-0967 or smccraney@charlottenc.gov.
