

# Mary Alexander

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services is finalizing the survey work for the Mary Alexander Storm Drainage Improvement Project. After the survey is complete, the existing drainage conditions will be evaluated within the project area. This project will focus on the storm drainage issues along Mary Alexander Road between East Mallard Creek Church Road and the entrance to the University of North Carolina at Charlotte. The project will also analyze the downstream channel that flows from Mary Alexander Road to where it meets Mallard Creek.

For more information about this project, please visit our website at: <http://stormwater.charmeck.org> Click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **Mary Alexander**.

If you have any questions, please contact Project Manager Steven McCraney at 704-432-0967 or [smccraney@charlottenc.gov](mailto:smccraney@charlottenc.gov).

October 2013

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
