

October 2015

Project Status:

Charlotte-Mecklenburg Storm Water Services continue to work towards the completion of the easement acquisition phase. During this phase, real estate agents from Michael Ryan Realty work with property owners to acquire easements necessary for construction of the proposed improvements.

Next Steps:

The design engineer will be preparing the final construction documents after all easements have been acquired.

Investing in Infrastructure

The City replaces pipes, storm drains and other structures when they deteriorate or become too small to handle increases in stormwater. Investing in infrastructure protects public safety, guards private property, improves water quality and enhances quality of life.

The Mary Alexander Storm Drainage Improvement Project goal is to reduce street flooding by improving the storm drainage infrastructure along Mary Alexander Road.
