

McAlway/Churchill

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

February 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and engineering consultant, Parsons Brinckerhoff, Inc., are in the early design phase of the McAlway/Churchill Storm Drainage Improvement Project. This project will improve storm drainage infrastructure and reduce street and structure flooding. Channel improvements to the creek will also be made to increase capacity and reduce erosion.

During the design phase, Parsons Brinckerhoff, Inc. will develop construction plans for the proposed storm drainage improvements. Once the preliminary construction plans are complete, we will hold a public

meeting to discuss the designed improvements and kickoff the easement acquisition phase. We expect to hold the public meeting later this year.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and McAlway/Churchill**.

If you have any questions, please contact Project Manager David Baker at 704-432-5569 or dtbaker@charlottenc.gov.

Within the last year, Storm Water fees...
Funded 57 Capital Improvement Projects and protected the
water quality of more than 3,000 miles of streams and shoreline.

Fees included funding of
the Upper Stoney Creek
Stream Restoration near
Mallard Creek Church
Road. In addition to
reconstructing open
channel areas, boulders
and logs were added
to reduce bank erosion
during large storm events.

*The Upper Stoney Creek stream
restoration project will improve water
quality, enhance forested riparian
areas and protect aquatic habitat.*
